Result Explanation Liquid-liquid extraction and acelitation step is done with hexane in one go instead of twice, and it is not applied in this procedure when hexane is going through sodium sulfate process.5 ml of hexane is used instead of 20 ml of hexane in the liquid-liquid extraction and acelitation stage, and the final volume in hexanes ends at 5 ml instead of 50 ml.The sample is cut in sizes not larger than 2-3 mm.
